

Rights Issue – How to avoid some common mistakes while making an online application

- Enter correct DP-ID (16 digits) and your PAN Number

- Block the amount from the same account which is linked to your De-mat account (If there is a joint holder in the De-mat account and you block amount through another bank account, your application may get rejected due to it being considered as a third party application).

- If the De-mat account has joint holders (A and B) and if the application is made from the account of the first joint holder (A) then please use the bank account details of the first joint holder (A) in order to make the application.

- The order of entering the PAN number in the application should be based on the order of names appearing in the De-mat accounts. If the application is made from second joint holder's name (B) then the PAN number should be that of the first holder (A)
